

GIT FLOW DIAGRAM

Branches:

- **Feature branch:** Created from develop, used for developing new project features.
- **Develop branch:** Accumulates feature changes for testing before merging into main.
- **Bugfix branch:** Addresses bugs isolated from main development, branch out from develop.
- **Release branch:** Prepares stable code for release, branch out from develop.
- **Hotfix branch:** Urgently fixes critical issues in production, branched from main.
- **Main branch:** Represents the stable release history of the project.
